

I feel the people of these United States have the right to listen to the music of their choice without big business trying to put our Satellite Company out of business. We do not want to hear all the commercials that we have had to hear over the last numbwe of years and are getting to the point that we just as soon keep the radio off. What ever happened when they gave us the right to choose what we wanted to watch or listen to? I am getting sick of everybody telling me what I can dop and what I have to wear when I am driving my automobile that is so over priced I can hardly afford it. Get off our backs and let XM alone.
